

TECH SPECS

UAVs per system	2
Ground Control Stations per system	1
Minimum number of operators	1
Launch from catapult rail	Yes
Launch from runway	Yes
Interchangeable payloads	Yes
Optional Remote Viewing Clients	Yes
SYSTEM SPECS	
Datalink range	50 km
UAV SPECS	
Wingspan	3.30m
Length	2.27m
Height	0.91m
Maximum take-off weight	21.5kg
Maximum Endurance	>6 hours

REDKITE UAS

COST-EFFECTIVE TACTICAL ISTAR

REDKITE delivers highly cost-effective tactical ISTAR and has many other roles. The system offers comparable performance to much larger systems, but from a robust and compact system. Integrated with Blue Bear's market leading avionics and NEXUS ground control stations, REDKITE offers the user effective ISTAR capability, but with a low training overhead.

OPERATOR FOCUSED

REDKITE is a simple system with low logistical overhead compared to more complex tactical platforms. It has a small footprint and can be operated from small fields with austere support.

STAY FOCUSED

Blue Bear open-systems architecture permit the end-user to tailor the package to their individual requirements. This includes rapid payload integration.

STAY AGILE

Blue Bear engineers and systems maintain a leading-edge technology awareness to ensure our systems offer leading edge capabilities and upgrade paths.
